

In the specification:

Page, 8, delete the last paragraph in lines 15-18, and insert the following:

As can be seen from the drawings, the piston 8 has a second piston rod 20 connected thereto which extends to the right. A connecting rod (which attaches the second piston rod to the piston 8) of the second piston rod 20 has the same diameter as the piston rod 9 of piston 8, to assure that both pistons 5 and 8 have the same piston areas 21 and 22 correspondingly at the right side thereof. The second piston rod 20 moves together with the piston 8 and is slidable within a rear portion of the housing.
